DAWIT MAHABAW

Full-Stack Web Developer & Information Science Student

Addis Ababa, Ethiopia +251 979 454 078 dawitmahabaw03@gmail.com github.com/DawitMahabaw LinkedIn
dev-codes.site

PROFESSIONAL SUMMARY

Full-stack developer specialized in the MERN stack, with hands-on experience building responsive web applications, REST APIs, and AI-powered features. Skilled in React, Node.js, Express.js, MySQL, and integrating generative AI and retrieval-augmented generation (RAG). Currently pursuing a Bachelor of Science in Information Science at Addis Ababa University. Seeking a software development opportunity where I can contribute to real-world projects, deliver meaningful solutions, and continue growing as an engineer.

TECHNICAL SKILLS

Languages & Core	:	JavaScript (ES6+) · SQL · HTML5 · CSS3
Frontend Stack	:	React 19 · Context API · Axios · CSS Modules · Responsive Design
Backend & APIs	:	Node.js · Express.js · RESTful APIs · JWT Authentication · Middleware
Databases & Modeling	:	MySQL · Relational Schema Design · Normalization · CRUD
AI & Smart Systems	:	Retrieval-Augmented Generation (RAG) · Vector Embeddings · Semantic Search
Tools & Workflow	:	Git · GitHub · Trello · Postman · VS Code · Bash/CLI

FEATURED PROJECTS

AI-Powered Q&A Forum — Live Demo

React 19, Node.js, Express, MySQL, RAG Pipeline, Vector Embeddings, Google OAuth, JWT

- Architected an end-to-end community discussion platform featuring role-based JWT authentication, Google OAuth integration, email verification, and API rate limiting.
- Engineered a normalized MySQL relational database schema with cascading constraints and foreign keys to guarantee data integrity across user posts and replies.
- Constructed an AI-driven RAG pipeline and semantic search engine that ingests and parses uploaded PDF documents into text chunks and vector embeddings using the Google Gemini API for knowledge-grounded Q&A.

AI Conversational Assistant (EthioGPT) — Live Demo

React, Node.js, Express.js, MySQL, Google Gemini API, JWT Authentication

- Engineered a full-stack ChatGPT-style conversational assistant integrating the Google Gemini API with Markdown rendering and code syntax highlighting.
- Implemented a dual-tier user flow supporting instant guest chats and authenticated accounts secured with Bcrypt password hashing and JWT authorization.
- Designed persistent relational MySQL storage with connection pooling for multi-thread conversation histories, enabling users to create, search, and delete chat sessions.

EthioMovie – Media Discovery Web App — Live Demo

React 19, Vite, TMDB REST API, Axios, Swiper, CSS Modules

- Built a responsive movie browsing interface consuming dynamic real-time catalog categories from the TMDB REST API via Axios.
- Integrated horizontal touch-responsive carousels using Swiper and implemented dynamic hero banners featuring trending titles.
- Applied modular component architecture with client-side React Router navigation and scoped CSS Modules for smooth performance across mobile and desktop devices.

EDUCATION

Bachelor of Science in Information Science — 2025 – Present

Addis Ababa University (AAU) — Addis Ababa, Ethiopia

- Relevant Coursework: Relational Database Systems, Procedural & Object-Oriented Programming (C++).

Certificate: AI-Powered Full-Stack Application Development — Mar 2026 – Oct 2026

Evangadi Networks — Remote Immersion

- Completed 1,000+ hours of rigorous, project-driven training—mastering modern React and Node.js architectures, relational database design, token-based security, and applied AI workflows.

Certificate: Front-End Web Developer Nanodegree — 2025

Udacity — Remote

- Built responsive web pages using HTML, CSS, and JavaScript, and learned asynchronous JavaScript.
